Daylilies

(HEMEROCALLIS)

Living Assurance of Beauty for
Garden or Border... Easy to Grow
...For Anybody... Anywhere... and
Always Delightful

DAYLILIES, beloved of our grandmothers—and of their grandmothers too—are beautiful, austere, and stately examples of the immortal lilies of ancient history, tradition, legend, art, and poetry. Always we have been bidden to consider the lilies, and always to consider them in their immaculate purity. And in the modern hybrid Daylilies there are varieties of many shades and colors, departing from the original waxen whiteness; yet even in the warmer hues, with rosy and ruddy and golden effects, there is still inherent simplicity and innocence.

In the old cottage gardens and on the farms, the summer visits of the Daylilies were comparatively brief. The old folks and the young wives and the children cultivated and watered and weeded the gardens about the plants, and watched anxiously for buds and opening blooms, but the cherished beauties came and tarried but a little while, and then were gone for another year. Now, however, our splendid collections of many modern varieties of these old favorites afford us a succession of lavish and lovely displays. For example, the exquisite and expansive "Hyperion" finest of all modern Daylilies, in lemon yellow, and exquisitely fragrant, remains with us through July and August; while the very fine fragrant variety "Dr. Regel" arrives in May and stays till the middle of June. The orange and mahogany "Mikado," flames through June and July, and then sometimes astonishes you by continuing through August, September, and even part of October.

NEW AND DISTINGUISHED HYBRIDS NOW AVAILABLE

Many of the sensational new and unusual varieties listed here have been released quite recently by their world-famed originator, Dr. A. B. Stout, of the New York Botanical Gardens. Others, also worthy of remark, and already acclaimed for their novelty and beauty, are my own introductions; in offering some of them for the first time, I am obliged to set high prices on them, because of the limited number of plants of each variety ready for distribution.

There are also superb and beloved old favorites here, however, and one is Hemerocallis Flava, described and named by the great master

Linnaeus himself, long before the American Revolution, and known today in some old gardens as the "Lemon Lily." Another ancient and cherished one is Hemerocallis Fulva, the tawny Daylily that blooms on a sturdy 54-inch stalk; and there are other veterans for those who value the tried and true along with the more modern marvels.

NO FINER LILIES GROW OR BLOOM

Few plants of any sort can match these Daylilies in any situation, for vigor, ruggedness, and adaptability to any or all sorts of soil or conditions. Full sun, or partial shade, wherever there is just ordinary garden soil, will secure for you a full summer of beauty from your Daylily collection; and once the planting is done, your Daylily garden is established virtually forever, or as long as that garden may remain undisturbed by the march of progress or urban growth.

The variety of form is astonishing, and you will find gorgeous blooms on five-foot stems as well as the daintier Miniatures for your rock garden or the border. Many of the varieties are delicately or pungently fragrant, and all of them are beautiful in their various ways, and surprisingly free from diseases and susceptibility to insect pests.

Here in this folder, along with the beloved Daylilies, I have offered also a few of the best of the True Lilies, to delight all those who are especially fond of such precious traditional treasures. I would also invite your attention to my personal selections of the most superb Painted Daisies.

Payments may be made by check, money order, cash, or stamps, which should be sent along with the order. If cash or stamps are sent the letter should be registered. I do not make C. O. D. shipments, as I have never found the practice satisfactory either to the customer or myself. All shipments will be sent express and everything in this folder will be sent either from Bayside or from my nursery in New Jersey, the small express charge to be paid by the purchaser on receipt of the package.

SUPERB PAINTED DAISIES

As a creator and critic of flowers, I have selected these Painted Daisies as a special offering for those who can appreciate them. They are rare masterpieces of floral art in the garden, and you will have to go far to discover anything more gorgeous for table decoration. They must be grown from cuttings of the original plants, to perpetuate the beauty of the original, so I offer only plants that have been grown from cuttings, and can be offered as authentic and true-to-name.

Brilliant—Best of all the Painted Daisies, the gorgeously brilliant fully double flowers being of bright red.

Victory—The fully double fluffy pure snow white flowers are freely produced on stiff stems.

Miami Queen—A very lovely soft pink. Makes a superb plant.

These flowers are actually four times as large as the above illustration, and as handsome as they are large. They blossom profusely from mid-summer until killed by frost. There are 3 colors, red, pink, and white. Flowers as big as a dinner plate, produced day after day, week after week, will make them the centre of attraction.

Phlox - COLUMBIA

Plant Patent No. 118

This is the finest pink phlox I have ever grown. Each plant quickly produces many flowering stalks, literally covering the plant with masses of cameo-pink flowers, with a soft blue eye. It is the most profuse bloomer, being in bloom from June until killed by frost. As a bedding plant it is unsurpassed.

* PLANTAIN LILY *

The Plantain Lily is one of the easiest of all plants to grow and vies with the Daylily in vigour, hardiness, ease of culture, and beauty of flowers and foliage. The variety I am offering "Hostea Subcordata Grandiflora" is the finest of all Plantain Lilies with ornamental foliage and large, snow white, fragrant blossoms resembling Easter Lilies and almost as large. These Plantain Lilies are so hardy that they will grow anywhere, in sun or shade with practically no care. They are equally attractive in a wild garden or in a border or a bed by themselves.

Wherever planted they will take care of themselves. Do not confuse this variety, which is quite rare, with ordinary Plantain Lilies. Fine strong flowering size plants—75c each; 3 for \$2.00; 6 for \$3.50; 12 for \$6.50; 100 for \$50.00.
